

## **Mayor's Report, June 8, 2010**

### **Items Worked On:**

5/26- Attended Economic Alliance meeting in Omak. (No quorum)

-Maggie Coon, PDA, gave update, still developing draft master plan to be released 6/09

-John Sirios, CCT Energy Program, gave overview of tribal efforts to develop a broad energy policy, especially with regards to alternative energy, including use of bio-mass (gasification) and potentially use of canola for bio-fuels.

Conversed with Laura Clark, Okanogan Conservation District, asked about the possibility of OCD assisting with an urban irrigation conservation education effort. She replied that the Town would have to join the District (\$5/parcel) to gain benefits. The Town had previously been a member, but thought that it could offer it's own education campaign, and ended relationship.

MVL CUP- Numerous conversations with individuals and organizations about situation; lots of expressions support for the Town's position, including potentially financial or organizational support.

6/04- Water- Conversation with Tim Fynn (Aspect Consulting), talked about strategy, potential opportunity to purchase 50-60 af of water.

6/07 Airport Project Management RFQ evaluations

Trails- some assistance to Colleen, prepping for RCO grant app.

Alcohol/ Park Event Permit: Fiddler's Contest pulled out. Feedback that process is onerous. I share some of the concerns, am concerned of impression that Town is difficult to deal with.

Personnel Issues (to be addressed in Executive Session)

### **In the Next Couple of Weeks:**

Get back to MWC, re administrative support and contract

Letter to DOE, re: MVL CUP

Departmental Meetings?

Organize Water Summit

Town Comments on County Comp Plan?
